

LMS Academy — Stakeholder Overview

Smart Sourcing USA | Learning Management System
One-page summary for non-technical audiences | June 2026

What is LMS Academy?

LMS Academy is Smart Sourcing USA’s online training platform. It supports **two audiences**:

1. **Internal employees** — company staff who train for free on internal and shared courses.
2. **External learners** — public registrants who browse the catalog, pay for courses, and can be tracked through a hiring pipeline.

Trainers and administrators manage courses, monitor progress, handle payments, and review candidates from a secure dashboard.

Who Uses the Platform?

Role	Typical user	What they do
Employee learner	Staff with company email	Enroll free; access internal training
External learner	Job seekers, contractors	Register, pay for courses, complete training
Trainer	Course author	Create courses, view student progress
Administrator	HR, ops, leadership	Users, payments, candidates, refunds

Key Features

1. Course catalog and access

- Public catalog for guests and external learners
- Internal-only courses hidden from public; visible to employees
- Courses marked Internal, Public, or Both

2. Public paid enrollment

- Buy Now → secure checkout (Stripe sandbox ready)
- Automatic enrollment after payment
- Employees enroll free — no checkout

3. Candidate pipeline (HR)

- Profile + CV, scores, completion on paid courses/exams
- Stages: New → In Review → Shortlisted → Hired / Rejected

4. Payments and refunds

- Refund Tracking with audit log
- Process Refund via Stripe/PayPal when candidate is Hired

5. Trainer visibility & content protection

- Student Progress per course (completion, quizzes, assignments)

- Course player limits casual copying; secure video links for enrolled users
- Assignment PDFs remain downloadable

User journeys

External learner:

Browse catalog → Register → Buy course (Stripe) → Take course → HR reviews in Candidate Pipeline

Employee:

Log in (company email) → Browse courses → Enroll free → Complete training

HR (hired candidate):

Candidate Pipeline → Mark Hired → Process Refund → Update notes

Setup notes

Item	Notes
Stripe test keys	Required for checkout testing
Production payments	Switch to live keys when ready
Content protection	Deters casual copying; not full DRM

Elevator pitch: LMS Academy is our training and hiring platform. Employees train free on internal content. External learners pay through a public catalog. HR tracks candidates with CVs, scores, and hiring status, and can process refunds when someone is hired. Trainers see real progress, and course content is protected while assignment materials stay downloadable.
